Platmap Design Offerings

Bring a new development to life with a detailed development site plan. Let our team create clear platmap redraws of various sizes, lots, orientations and styling options.

Transform your rough site plans into vibrant, colorized plat maps that enhance communication and marketing. We take the original site plan drawings and turn them into dynamic, visually appealing maps that are tailored to your needs.

When submitting a platmap job, consider the following:

- Style option selection?
- Vertical or horizontal orientation?
- Include lot numbers?
- Include road names?
- Include lot square footage?
- Display a north compass?
- Include a legend with different colors for different lot statuses?
- Output file type?
- Do you want this plat redraw made into a flyer?
- Does your flyer need to include a builder logo?
- Will your flyer use non-Coldwell Banker branding?
